Phone: 240-543-2830 - nospapa57@gmail.com - Potomac, Maryland - <https://linktr.ee/nospapa>

PROFESSIONAL OVERVIEW

Cybersecurity professional with Splunk certification, federal scientific environment experience, and a home lab where I explore hacking techniques and detection methods to build hands-on skills. Driven to break into a technical role or internship and eventually grow into Red Teaming. Strong foundation in endpoint security, network protocols, and log analysis, with a passion for continuous learning and hands-on problem solving.

TECHNICAL SKILLS

Windows | Virtualization | Active Directory (AD) | Kali Linux | Metasploit | Nmap | MacOS | TCP/IP | DNS | VLAN | Python | Java | PowerShell | Bash | React.js | Vulnerability Management | Splunk | Identity Access Management (IAM) | Wireshark | VPN | Log analysis | Security Information and Event Monitoring (SIEM) | Information Security

EDUCATION & CERTIFICATIONS

- *Bachelor of Science, Cyber Operations, University of Maryland Global Campus (Summer, 2026)*
- *Associate of Applied Science, Cybersecurity, Montgomery College (2024)*
- *Splunk Core Certified User - Splunk (April 2025)*

HOME LAB PROJECTS

- Built a virtual pen-testing lab using Kali Linux and Metasploitable in VirtualBox on an isolated internal network using static IPs to enable controlled exploit testing and traffic analysis.
 - Developed a reverse shell back-door in Python using `os.dup2` for remote command execution via TCP.
 - Built a TCP port scanner in Python that logs open ports and writes timestamped reports to a 'scan_reports' directory.
 - Executed Nmap scans and exploited misconfigured TCP ports (512-514) to gain root access via 'rlogin' on Metasploitable2.
 - Leveraged NFS exports to inject SSH keys into the root 'authorized_keys' file. Simulated attacks on UnrealIRCd (port 6667) and the ingreslock backdoor (port 1524) on Metasploitable2.
 - Designed and developed a responsive portfolio website using React to showcase skills, projects, and career goals. Includes personal insights, technical experience, and live project examples. Deployed using GitHub Pages and GitHub for version control.
-

PROFESSIONAL EXPERIENCE

IT Technician (Contractor) National Institutes of Health – NIDDK/NIMH/NCI | June 2024 - Present

- Monitoring and troubleshooting endpoint network connectivity, managing user access and permissions via Active Directory, ensuring compliance with internal security policies.
- Implementing endpoint security measures using group policy, improving compliance across 500+ systems.
- Timely incident resolution aligned with SLAs, supporting system availability and vulnerability management resulting in 50+ incidents resolved per week.
- Troubleshooting certificate authentication errors with Kerberos and Microsoft products.
- Provided security training to 100+ end users, increasing compliance awareness.

Desktop Support Specialist (Contractor) Telaforce LLC | June 2022 - March 2023

- Diagnosing and resolving hardware and firmware issues across multiple county departments, ensuring consistent endpoint performance.
- Rolled out full-disk encryption upgrades (BitLocker AES 128 -> 256) to strengthen endpoint data protection.
- Conducting software patching and system updates to mitigate vulnerabilities and support security compliance.
- Provided Tier 1 and Tier 2 support, reducing ticket resolution times by 15%.
- Assisted in rollout of system updates to ensure compliance with security policies.
